Site: [catalin-luntraru.com](http://catalin-luntraru.com)

**Profile** Hi, my name is Catalin Luntraru and I'm a senior PHP and Javascript full stack developer with **12 years of experience**:

- **11 years of Full Stack LAMP (PHP, MySQL, Javascript, HTML, CSS)**
- **1 year of Full Stack Javascript (Node.js, React, Redux)**

My portfolio site can be seen here: [www.catalin-luntraru.com](http://www.catalin-luntraru.com)

I have created a browser mmorpg called degony a while back (some screenshots - <http://www.degony.com/media-screenshots.html>) with PHP, MySQL, JQuery and push technology.

I have worked on a starter kit at <https://redux-minimal.js.org/> and also made a video tutorial to get people into react and redux at <https://www.youtube.com/watch?v=d0oUGmSE6IY&list=PLJBrYU54JD2pTb1B20OmV7GL6H5J-p2g8>

Now I'm currently working on a node.js ecommerce solution <https://github.com/catalin-luntraru/nodecart> which uses as fewer dependencies as possible, getting back to the roots of node.js

I was a speaker at codecamp.ro last year talking about React/Redux, and this year about NoSQL databases.

**Key Skills** Programming: Javascript, PHP, MySQL, HTML, CSS, Linux, Git, Ecommerce (Paypal, Stripe, Paymentwall and most of the major gateways), SEO, Web Sockets, Adobe Fireworks.

Frameworks: Javascript (Node.js, React, Redux, JQuery)  
CSS (Bootstrap, Less), PHP (Zend Framework, Cake, Mojavi / Symphony)

CMS: Wordpress, Joomla, Drupal, Magento, Opencart, osCommerce, PhpBB, Vbulletin, SMF.

## Career History

Duration: **2016 - present**

Company: -

Job Position: **Freelancer**

I have been working as a freelancer on all sort of projects which involved full stack node.js with react/redux on the front end, or ruby and php backend with react/redux front end, and also on node.js with pure javascript on front-end.

Duration: **2012 - 2016**

Company: Enjin, an international gaming community company

Job Position: **Full Stack programmer**

I worked on almost all the features of the site, but most importantly a very complex shopping system which implements 10+ payment gateways with recurring payments, minecraft integration, sales, coupons etc. I also had to optimize complex mysql queries, front-end optimization for complex javascript, full unit tests for the entire payment/billing code, etc. In the end we starting working with REACT/redux migrating to a npm based system.

Duration: **2012**

Company: Odesk, Elance

Job Position: **Freelancer**

I have been working as a freelance web programmer on Ecommerce multi-shops, vBulletin integration, custom CMS, custom portal, Amazon S3/Cloudfront, etc.

Duration: **2010 - 2011**

Company: Yasssu, an austrian podcasts/video company

Job Position: **Lead Programmer**

I have relocated myself to Vienna, Austria and worked for almost a year, on site, for this project. Basically it involved managing podcasts, implementing complex search engines, javascript for mobile platforms and innovative user interface.

Duration: **2009 - 2010**

Company: Variete, an UK ecommerce retailer

Job Position: **CTO**

I have worked with magento installed as a single instance for approx 40 ecommerce websites and almost 25,000 products. I was involved in managing the dedicated server and the magento installation with all its plugins and scripts.

Duration: **2009**

Company: Degony.com, my own browser MMORPG

Job Position: **Creator**

I always wanted to create a game, so you can call Degony.com my very own browser mmorpg. I have used Jquery and Stomp to create the game dynamics (battle, chat, etc) and setup a custom dedicated server to hold everything together.

The graphics were done by a hired artist, but the wrapping and tuning and everything else was done by me.

Duration: **2008 - 2009**

Company: Tailcast, an UK (Gibraltar) social network/art company

Job Position: **CTO**

I created the social network website and supervised 3 people to work together. I have coded lots of widgets using JQuery including a wysiwyg text editor and built an audio player by using Flex (AS3). I also used Youtube's API to publish/update videos and worked with Amazon EC2 to push videos for encoding.

Duration: **2006 - 2008**

Company: Bootsnaill, an american travelling company

Job Position: **Web Programmer**

I created a booking website for trips, an ecommerce shop for traveling gear, based on xml feeds from different providers. I also worked on a multi blog using wordpress-mu and created custom maps with google maps for the adventure sites.

Duration: **2005 – 2006**

Company: Elcadia, a romanian freelance company

Job Position: **Web Programmer**

I built different websites from ecommerce and real estate sites to blogs and auction sites. Most of them were custom code, but I also worked with oscommerce, wordpress, vbulletin, and other cms packages.

**Professional Training**

PHP - Zend Certified Engineer

MySQL - Certified MySQL Associate

HTML/CSS - W3Schools Certified XHTML/CSS Developer

Javascript - W3Schools Certified Javascript Developer

**Personal Details**

Date of Birth:	27th April 1985
Marital Status:	Unmarried
Driving Ability:	Clean Driving License since 18th October 2003
Nationality:	Romanian
Second languages:	I speak fluent English

**Interest and Hobbies**

I like to go to the gym, playing games and spend time with my friends.
